

**PERSONAL INFORMATION**

Name **LOUIS HENDRIKS**

**EDUCATION AND TRAINING**

Degree Master of Science in Agriculture (Soil and Water) 1994 of the Wageningen University with specialisation on Spatial Statistics, remote Sensing and Geographical Information Systems.

**WORK EXPERIENCE**

Regional Traffic manager at Rijkswaterstaat (region Limburg) - June 2006 till 2011.

**Actual position**

Since 2011 Advisor international network traffic management at the National Traffic Management Centre of [Rijkswaterstaat](#)

**Main issues in the working scope**

Main issue of interest for me is to strengthen the community of people involved in the field of ITS for Traffic Management. Sharing ITS knowledge and experiences are key elements. Therefore I enjoy to bring people together eg. in workshops focussing on solving questions of ITS implementations. Innovations which improve Traffic Management (technical as well organizational) are like a red thread in my work. Being chair as well of the Rijkswaterstaat ITS team gives me the opportunity to link (inter)national ITS activities.

**Activity in the European ITS Platform and Corridors**

Since 2012 [Activity leader of "Monitoring and Harmonisation of National Access Points"](#). Member of [Expert Group Traffic Management](#) and Expert Group on Traffic Information Services within EIP activity "Monitoring and Dissemination (including ITS Deployment Guidelines)". Responsible to keep the [European Leading Innovation Timeline \(EU LIT\) – impact on traffic management](#) up to date.

Last but not least member of the EU EIP Communication team.
