

PERSONAL INFORMATION

Name

REME ALAIN

EDUCATION AND TRAINING

Civil Engineer , specialized in road sector, Ecole Nationale des Travaux Publics de l'Etat (ENTPE)

WORK EXPERIENCE

Actual position

Head of the Unit dedicated to Geomatics, Traffic, ITS and road management studies in Cerema Méditerranée.

Main issues in the working scope

I started my career in the 80s as Director of the transport division in a Regional Traffic Information Center in Lyon. In this center I participated to the first development and implementation on Intelligent Transport Systems (ITS) service in France.

This first ITS concrete approche allowed me to join the European projects studies in the framework of ITS. I was involved as coordinator or national representative in various projects within the 3rd and 4th FPRD: DESPINA (servers for multimodal information forecasting) and HANNIBAL (traffic management for the Alps Crossing). Then I ensured the international coordination of the SERTI project (implementation of information services and traffic management measures in the south of Europe) and participated to various actions as National EU project representative in the Easyway programme: technical committee, Traffic management expert group deputy leader, cross border traffic management plan studies, DATEX II TC leader. I am currently supporting the Ministry of Transport for the ITS Directive implementation.

Activity in the European ITS Platform and Corridors

I am serving as SA4.5 activity leader and participating to A2 activity.
